

3D CONSTRUCTION

www.msartroom.com

RESEARCH:

We will be looking at Peter Callesen's paper sculptures and Jamie Caliri as our focal artists along with various other works of art by other artists.

Peter Callesen is a Danish artist and author. Callesen is renowned for his talent in combining the minimalism of a big crisp white sheet of paper with the complexity of meticulously cut and folded paper.

Jamie Caliri is a director, known primarily for music videos and television commercials. He was born on February 22, 1970 in Buffalo, New York. (most known for Lemony Snicket's End Credits)

PLANNING:

What is the one thing that makes you wake up every day? Is it books? Is it your alarm clock, (haha!) Is it the people you know? Do you love words? Do you love food? Are you into stories or objects? In this project, you will communicate with us your most favorite personal obsession or personal possession.

CONSTRUCTION:

Your paper sculpture may be:

3Dimensional in rotation...

or Relief sculpture from above view.

It may have drawings added

It may change colors!

You may cut it or score it (halfway cut)!

Folding is preferred, but

you may use Elmer's glue and clips

PAPER sculpture

Exploration of
Positive Space vs
Negative Space!

Create Repetition!

<http://www.petercallesen.com>

Paper has so many
unique qualities,
bending, scoring,
color, textures...
